

# Figure Drawing I Class

Heighten your visual awareness with tools and exercises designed to access the creative (right) side of the brain. We will draw from the model, focusing on process (skill-building) more than product. This is a high-energy class! It will help you loosen up as your drawing skills improve. Demos, lots of practice, and individual guidance are provided. Ideal for beginners, as well as practicing professionals! Limited to 12 students.

2.5 hours; 6 sessions

## Syllabus

- |                              |                  |
|------------------------------|------------------|
| 1. <b>Gesture</b>            | charcoal         |
| 2. <b>Edges</b>              | ink wash         |
| 3. <b>Negative Space</b>     | ink wash         |
| 4. <b>Angles</b>             | charcoal         |
| 5. <b>Proportions</b>        | charcoal         |
| 6. <b>Light &amp; Shadow</b> | conte / charcoal |
| 7. <b>Gestalt + Critique</b> | student choice   |

Each class will have a Demonstration on the topic, and plenty of drawing from the model, with individual instruction. Some of the classes will also have an exercise to access Right brain functioning, borrowed from Betty Edwards's *Drawing on the Right Side of the Brain*. There will be a short break halfway through the class.

Enjoy!
