

FIND YOUR FLOW: FLUID PAINTING WORKSHOP – MATERIALS LIST (POTTER)

For a more detailed supplies list suggestion with links on where to purchase, read [this article of mine](#) about what you need to start pour painting at home!

- **Pouring Medium**
 - [Floetrol](#) is the cheapest pouring medium. You can get it at Home Depot or Walmart and have it delivered.
 - [Liquitex Pouring Medium](#) and [GAC 800](#) are the artist-grade mediums you can get, but they are more expensive. If on a budget, stick to Floetrol.
- **Acrylic Paint**
 - [Craft Smart Acrylics](#) are a great option, but you can use any kind of acrylic paint.
 - For more advanced students, [high-flow Golden acrylics](#) are my preferred paints. You can test out colors with their [4 oz sizes](#) (\$6-\$10), or once you know what colors you love enough to use in large quantities, splurge for their [16 oz sizes](#) at Michael's. The larger tubes range from \$25-65 at Michael's depending on rarity of color. I like to wait until they go on sale at [Jerry's Artarama](#).
- **Canvas, Cardboard, Panel, or any hard, thick surface**
 - [Stretched canvases](#) and [artist panels](#) are great. I recommend 2 8x10 canvases and 1 16x20. Smaller "minis" are good for practicing. You can also pour paint on any hard surface like CD's or cardboard if you'd like to make some "tests."
- **Plastic Trifecta: Cups, Spoons, and Tarp- Purchase from Walmart or Home Depot**
- **Gloves- purchase from Walmart or Home Depot**
- **Silicone Oil (optional)- purchase at Home Depot**
- **Blow Torch (optional)- purchase at Home Depot**
